

Quality Policy Statement

“SOCAR” jointly with the major industrial players in the country initiated strategically important project for reinforcing the development of the petrochemical sector of Azerbaijan and achieved in foundation of operating plant – “SOCAR Polymer” with production facilities consisting of Polypropylene (PP) and High-Density Polyethylene (HDPE). Key objective of the project is application of the most leading and advanced technology and maximizing of value added within the petrochemical chain. “SOCAR Polymer” has intention to be the most trusted partner for our customers within international and local market by bringing together the knowledge, expertise and skills of our people.

To meet our goals, we continually have to:

Implement Quality Management System, determining quality objectives based on business needs, industry standards and best practices;

Dedicate to applying a systematic and measurable approach to continually improve our culture of quality, products and processes.

Quality is a culture brought to our business by Executive Management committed to ensure its adequacy and effectiveness and cascaded down to front line employees emphasizing that all our people are responsible for quality. Collaborating the knowledge, expertise and skills of our people is underpinned by quality management.

Quality is critical to the way we work at "SOCAR Polymer" – our customers expect it, and we have pride in delivery of all we do. The leadership team is primarily committed to, and accountable for, the implementation of the business structure and systems that support the enforcement of this policy statement within organization. It is aimed to emphasize leaders and employees' responsibilities to deliver safe, effective and high-quality Operating Management System.

In our endeavor to achieve these objectives to deliver excellence operation, “SOCAR Polymer” has adopted a policy of operating a coordinated Quality Management System meeting the requirements of the ISO 9001:2015 standard and strictly adheres to the following quality principles:

- ▶ Customer-focused organization - Ensuring the conformity of our products to our customers' requirements;
- ▶ Quality-focused leadership - Achieving quality goals, environmental protection, health and safety;
- ▶ Engagement of people and improvement of their skills - Promoting education and training at all relevant levels;
- ▶ Common and/or systematic process approach to management and operation - Acting in full compliance with national, international regulations and legislations and intercompany requirements;
- ▶ Continual improvement – Achieving effectiveness and efficiency in all our business processes and products;
- ▶ Evidence-based decision making – Increasing level of confidence in achieving the desired outcomes;
- ▶ Relationships management with suppliers – Empowering the organization to improve the entire supply chain, leading to strategic planning and better decision making.
